

South Central Region, Connecticut Demographic and Socioeconomic Trends

July 2021

Prepared by the South Central Regional Council of Governments

Introduction

About this Document

This document was compiled by SCRCOG Staff using the best available data as of July 1, 2021. Sources for the data include the U.S. Census Bureau's decennial census, 2015-2019 American Community Survey, the Connecticut Department of Labor, and the Connecticut Department of Economic and Community Development. Depending on the source, the most current data ranges from 2015 to 2021. Data sources are noted below the respective figure or table.

A Note Regarding the Comparison of Decennial Census Data to American Community Survey Data

The decennial census is based on a single point in time (ex. April 1, 2010) while the American Community Survey (ACS) is a rolling sample survey of the population (provides multi-year estimates). The decennial census is conducted every ten years (years that end in a zero), while the ACS is conducted annually. The ACS is released in 1-year and 5-year estimates. The 1-year estimates are collected for geographic areas with a population of at least 65,000, while the 5-year estimates encompass all geographic areas. The 1-year estimates are based on the smallest sample size, but are the most current, while the 5-year estimates are based on the largest sample size, but are the least current.

As a result of the data collection discrepancies, not all decennial census data can be directly compared to ACS data. The U.S. Census Bureau provides guidance on which variables can be compared. This guidance, as well as more information regarding the differences between the decennial census and ACS, is available at <https://www.census.gov/programs-surveys/acs/guidance.html>.

Please be aware that the instances in this document in which decennial census data is compared to ACS data is in an effort to show general trends in the data over time, rather than identify specific numerical changes in the data. For the purposes of this document, the 2015-2019 ACS data is considered 2019 data.

I - Defining the South Central Region

1 - Geography of the Region

The South Central Region is located within New Haven County in Southern Connecticut and is comprised of the following fifteen municipalities: Bethany, Branford, East Haven, Guilford, Hamden, Madison, Meriden, Milford, New Haven, North Branford, North Haven, Orange, Wallingford, West Haven, and Woodbridge (Figure 1.1). New Haven County exists solely as a geographic division for the U.S. Census and does not have any associated government structure or function. All the municipalities in the South Central Region, with the exception of Milford and Woodbridge, are located within the New Haven Labor Market Area. A labor market area is a geographic area, defined by the U.S. Bureau of Labor Statistics, “within which individuals can reside and find employment within a reasonable distance or can readily change employment without changing their place of residence.”¹

Figure 1.1: Geography of the South Central Region

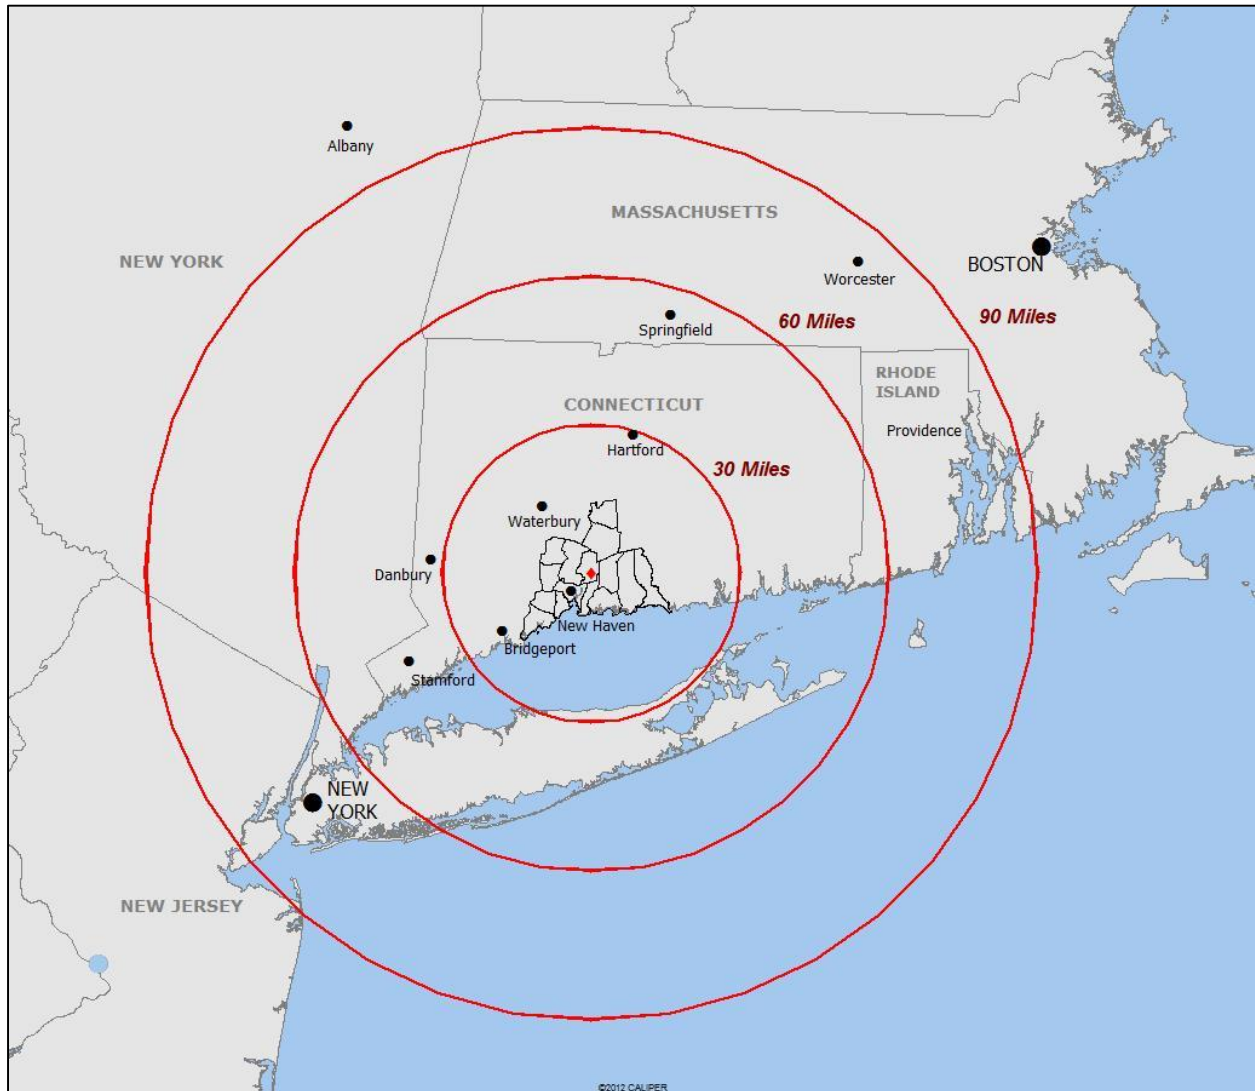

¹ Connecticut Department of Labor. Labor Market Information – Glossary of Terms. Accessed on May 2, 2019 from <http://www1.ctdol.state.ct.us/lmi/glossary.asp#L>

2 - Proximity of the Region to Major Cities

Figure 1.2 illustrates the South Central Region in relation to the greater geographic area. Specifically, the map depicts 30, 60, and 90 mile radii around the geographic center of the Region. There are four major Connecticut cities located within the 30 mile radius: Bridgeport, Hartford, New Haven, and Waterbury. The 60 mile radius encompasses all but the northeastern edge of Connecticut, Springfield, MA, Providence, RI and Westchester County, NY. The 90 mile radius includes all of Connecticut and Rhode Island, plus Long Island, NY and all five boroughs of New York City.

3 - Demographic and Socioeconomic Overview

Table 1.1 and Table 1.2 show changes in five demographic indicators (population, households, median household income, per capita income, and median age) for the South Central Region, New Haven Labor Market Area, and New Haven County. The South Central Region, the New Haven Labor Market, and New Haven County experienced a slight decrease in population from 2010 to 2019. Households also decreased in all three geographies. From 2010 to 2019, the median household income increased by 14.79% in the South Central Region, with slightly less growth happening in the New Haven Labor Market Area and New Haven County. The per capita income increased between 16.5% and 22.5% in the three geographic areas from 2010 to 2019. The median age has been steadily increasing in all three geographies since 2000.

Table 1.1: Regional Demographic and Socioeconomic Summary, 2000, 2010, & 2019

	South Central Region			New Haven Labor Market Area			New Haven County		
	2000	2010	2019	2000	2010	2019	2000	2010	2019

II - Population

1 - Change

Table 2.1 shows that the South Central Region and the State of Connecticut experienced slower population growth than the United States between 1990-2000 and 2000-2010. This trend continues, with both the South Central Region and State of Connecticut experiencing a negligible change in population since 2010. The 1990-2000 and 2000-2010 calculations are based on the population as recorded by the 1990, 2000, and 2010 U.S. decennial census (recorded as of April 1). The 2010-2019 calculations are based on the American Community Survey 5-Year Estimates for 2019. *Table 2.2* shows a breakdown of the South Central Region's population by municipality.

Table 2.1: Change in Population Since 1990

	1990 - 2000	2000 - 2010	2010 - 2019
South Central Region	1.85%	4.24%	-0.36%
Connecticut	3.60%	4.95%	0.03%
United States	13.15%	9.71%	5.17%

Table 2.2: Population by Municipality

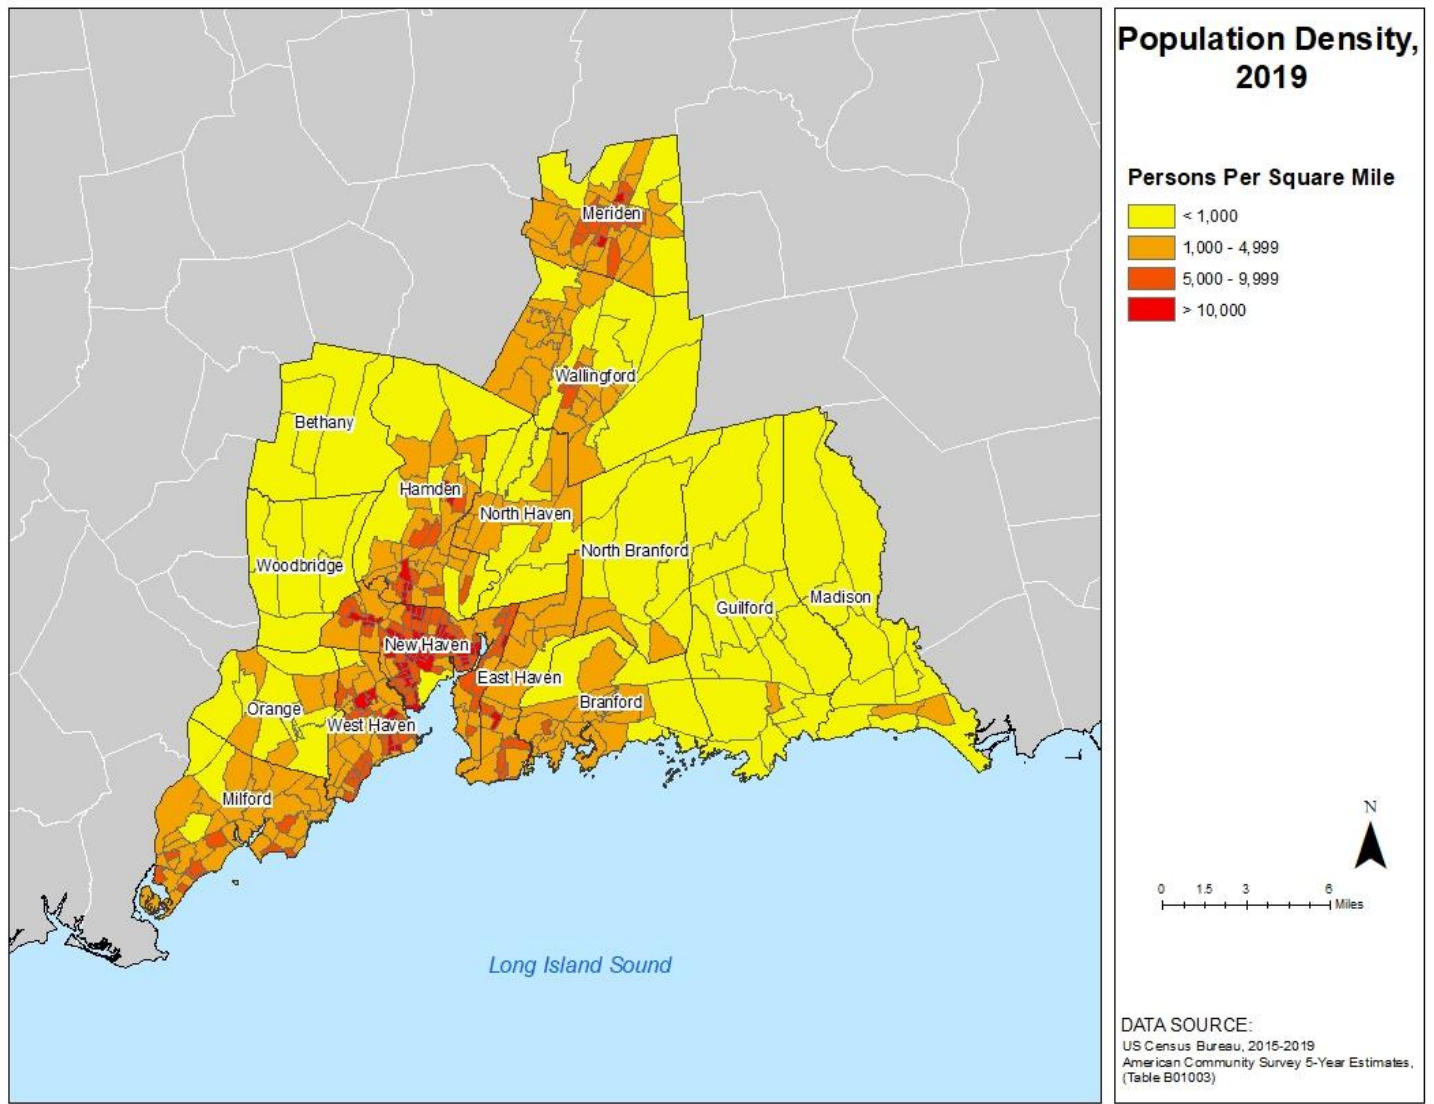

Municipality	Population			
	1990	2000	2010	2019
Bethany	4,608	5,040	5,563	5,513
Branford	27,603	28,683	28,026	28,020
East Haven	26,144	28,189	29,257	28,742
Guilford	19,848	21,398	22,375	22,216
Hamden	52,434	56,913	60,960	60,982
Madison	15,485	17,858	18,269	18,113
Meriden	59,479	58,244	60,868	59,676
Milford	49,938	52,305	52,759	54,328
New Haven	130,474	123,626	129,779	130,331
North Branford	12,996	13,906	14,407	14,191
North Haven	22,247	23,035	24,093	23,722
Orange	12,830	13,233	13,956	13,934
Wallingford	40,822	43,026	45,135	44,596
West Haven	54,021	52,360	55,564	54,763
Woodbridge	7,924	8,983	8,990	8,827
Total	536,853	546,799	570,001	567,954

Sources: U.S. Census Bureau, 1990 Census Data Profile 1, Census 2000 Data Profile 1, 2010 U.S. Census Demographic Profile Data (Table DP-1), 2015-2019 American Community Survey 5-Year Estimates (Table B01003)

2 - Density

Figure 2.1 shows the population density by census block group within the South Central Region. Areas with the highest concentration of population are found in New Haven, West Haven, and Hamden. The eastern and northwestern areas have the lowest population density.

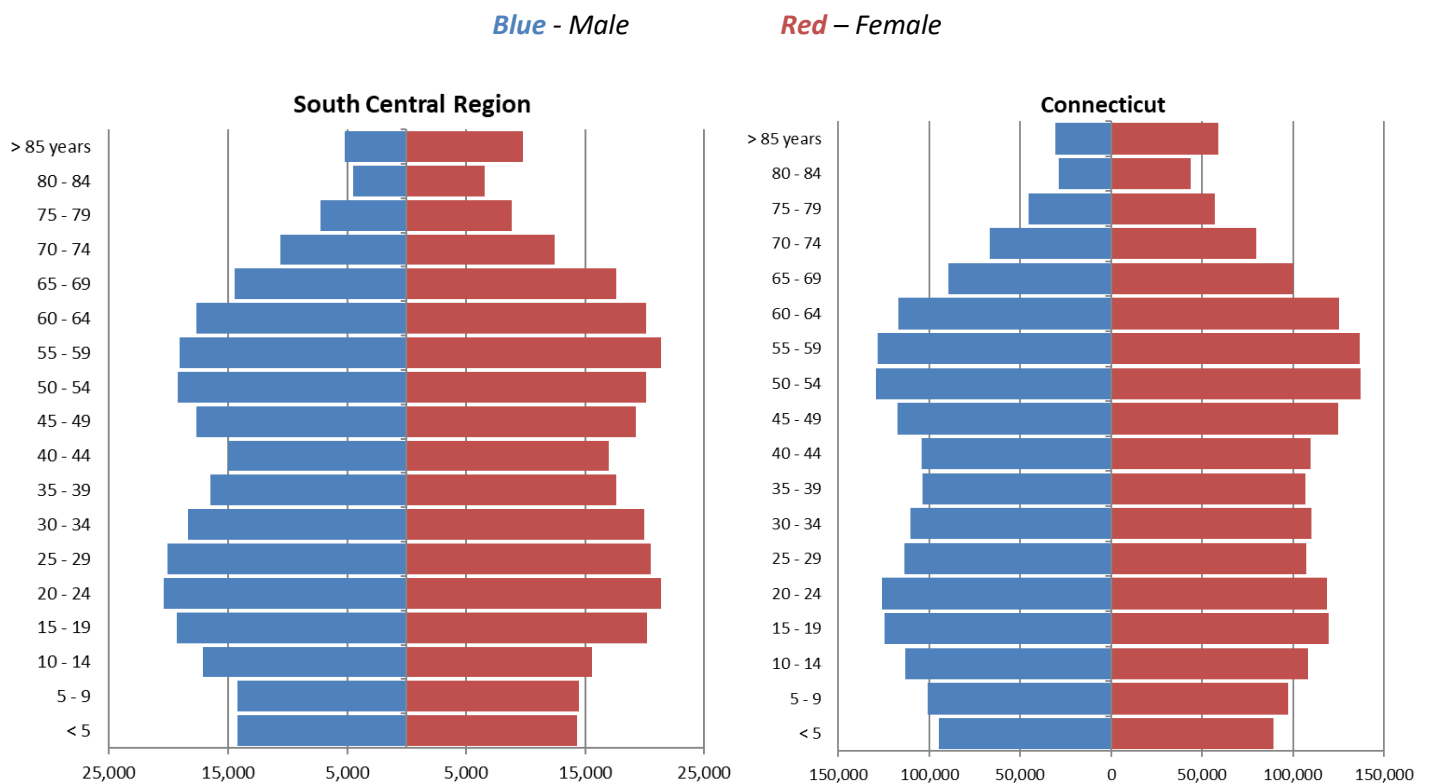

Figure 2.1: Population Density by Census Block Group, 2019

3 - Distribution by Age

The South Central Region and the State of Connecticut have a similar distribution of population by age and sex as shown by the population pyramids in *Figure 2.2*. The 20-24, 25-29, and 55-59 age groups have the largest representation in the South Central Region, and the 50-54 and 55-59 age groups have the largest representation in the State of Connecticut, respectively. The female population in the South Central Region and in the State of Connecticut dominates the 80-84 and 85+ age groups, which supports the historical trend of females having a higher life expectancy than males in the United States.²

Figure 2.2: Population Distribution by Age, 2019

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates (Table B01001)

² U.S. Census Bureau (2020). *Living Longer: Historical and Projected Life Expectancy in the United States, 1960 to 2060*. Accessed on July 29, 2021 from <https://www.census.gov/content/dam/Census/library/publications/2020/demo/p25-1145.pdf>

4 - Race and Ethnicity

In 2019, about 71.8% of the population in the South Central Region identified themselves as white, while about 14.4% identified themselves as black or African American. According to U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates, about 17% of the Region's population identifies themselves as Hispanic (taking into account all races).

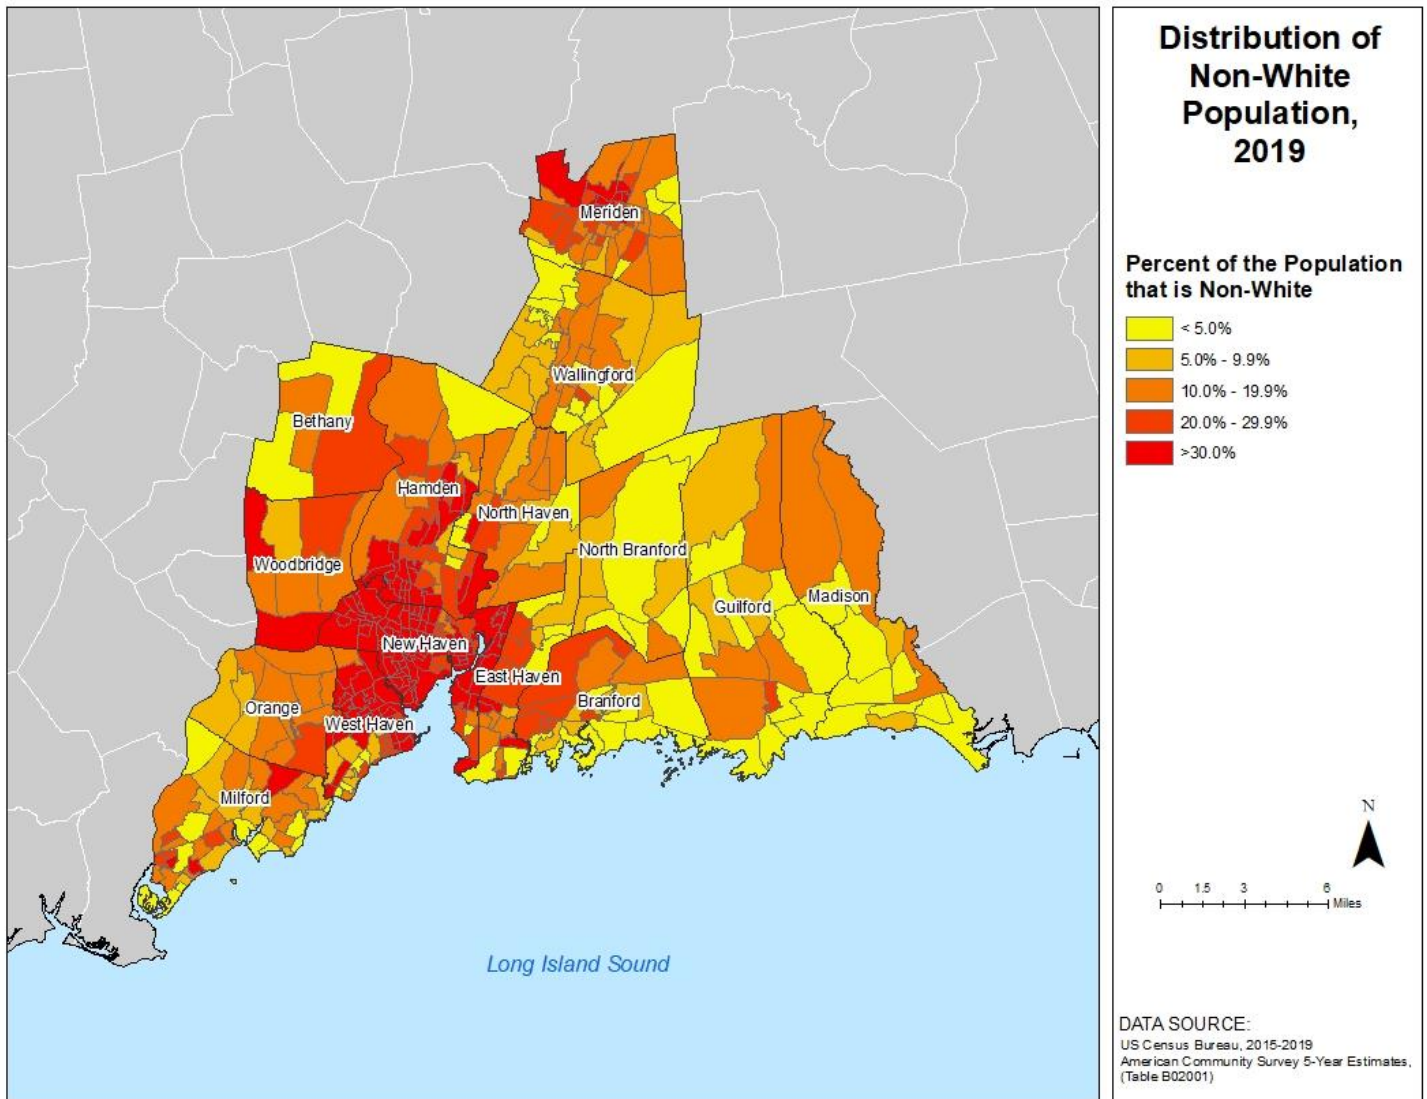

Figure 2.3: Regional Racial Distribution, 2019

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates (Table DP-05)

The population distribution of the non-white population by U.S. Census Bureau-designated census block group is shown in *Figure 2.4*. The percentage is the highest in New Haven, West Haven, Meriden and Hamden.

Figure 2.4: Distribution of Non-White Population by Block Group, 2019

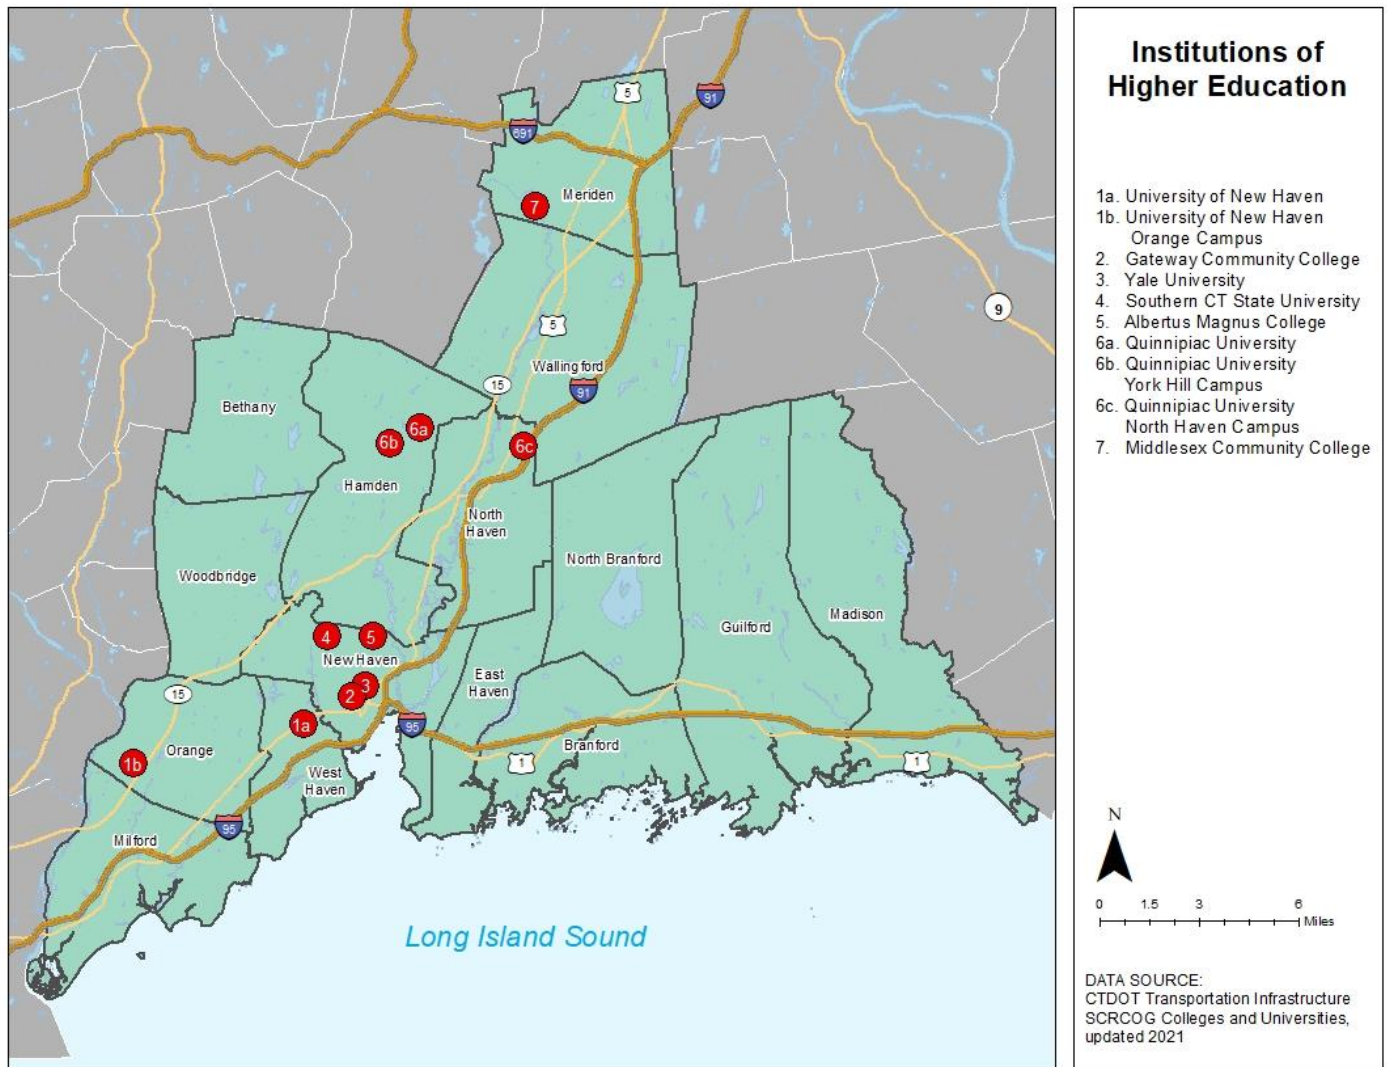

III - Higher Education

1 - Overview

The South Central Region is home to seven colleges and universities: Yale University, Southern Connecticut State University, Quinnipiac University, University of New Haven, Gateway Community College, Albertus Magnus College, and Middlesex Community College. In Fall 2019, there were approximately 48,000 students (undergraduate and graduate students) in the region. Yale University had the highest total enrollment with more than 10,000 students.³

³ U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics (2019). *College Navigator*. Accessed on July 29, 2021 from <https://nces.ed.gov/collegenavigator/>

2 - Educational Attainment

Figure 3.2, Figure 3.3, and Table 3.1 show the percentage of the population aged 25 years and older with a bachelor's degree or higher. Fourteen out of fifteen municipalities within the South Central Region saw an increase in educational attainment (bachelor's degree or higher) from 2000-2019. The most notable increases occurred within Orange, North Haven, and Milford, which experienced a 10.0% or greater increase. Six municipalities have higher educational attainment rates (bachelor's degree or higher) below both the regional (38.01%) and statewide average (39.28%): Meriden (22.27%), East Haven (23.97%), West Haven (24.26%), North Branford (34.01%), Wallingford (34.74%), and New Haven (34.88%).

IV - Housing

1 - Housing Permits

Figure 4.1 illustrates the number of housing permits issued for new privately-owned housing units in the South Central Region and the State of Connecticut since 1990. As shown in *Table 4.1*, 2019 data was only available for Branford (38), Milford (10), North Haven (41), and Wallingford (6).

2 - Median Home Sales Price

As shown in *Figure 4.2 and Table 4.2*, between 2020 and 2021, all fifteen municipalities experienced an increase in median sales price. The largest increase occurred in Orange (72.4%), while the smallest increase occurred in Wallingford (3.4%).

3 - Occupancy Status

In 2019, the total number of owner-occupied housing units was 134,549 (Table 4.3). The number of renter-occupied units has remained relatively stable since 2000. The number of vacant units has increased by about 9,058 since 2000. Overall, there has been about a 3.4% decrease in owner-occupied housing units, a 0.2% decrease in rental-occupied units, and 3.2% increase in vacant units. Tables 4.3 and 4.4 and Figure 4.3 detail the status and rates of occupancy by municipality.

Table 4.3: Occupancy Status of the Housing Stock in the South Central Region, 2000, 2010, & 2019

	2000		2010		2019	
Owner-Occupied	132,657	58.3%	142,162	59.3%	134,549	54.9%
Renter-Occupied	80,237	35.2%	78,465	32.7%	86,918	35.4%
Vacant	14,766	6.5%	19,295	8.0%	23,824	9.7%

4 - Affordability

One measure of housing affordability is the comparison of median household income to median home sales price. *Figure 4.4* compares the median household income to the median sales price by municipality. The red portion of the graph represents the median household income of the municipality. The red and blue portions combined represent the median home sales price.

Table 4.7 further examines housing affordability using data sources other than the US Census Bureau. Therefore, this table may contain data that differs from data presented elsewhere in this document. *Table 4.7* lists the number of existing assisted units in each town and the overall percentage of affordable housing stock, using data from the CT Department of Economic and Community Development (DECD). Assisted Units includes all units that are governmentally assisted, tenant rental assisted, have Single Family CHFA/USDA Mortgages, or are deed restricted. Deed restricted housing, as calculated by DECD, is based on households earning 80% of the area’s median household income and spending no more than 30% of income on housing. Only three towns (Meriden, New Haven, and West Haven) are exempt from Connecticut General Statute 8-30g: Affordable Housing Land Use Appeals, by having greater than 10% of their housing stock designated affordable.

Table 4.7: Existing Affordable Housing Units per the State Definition, 2019

Town	Total Housing Units (2010 Census)	Total Assisted Units (2019 Census)	% of Housing Stock
Bethany	2,044	14	0.68%
Branford	13,972	469	3.36%
East Haven	12,533	1,007	8.03%
Guilford	9,596	231	2.41%
Hamden	25,114	2,178	8.67%
Madison	8,049	136	1.69%
Meriden	25,892	4,260	16.45%
Milford	23,074	1,226	5.31%
New Haven	54,967	17,615	32.05%
North Branford	5,629	125	2.22%
North Haven	9,491	516	5.44%
Orange	5,345	73	1.37%

V - Transportation

1 - Regional Transportation Network

The South Central Region has a robust transportation network that accommodates diverse modes of travel (Figure 5.1). The Region is home to two interstate highways: I-91, which runs north-south, and I-95, which runs east-west. Other important highways are State Routes 1, 5, and 15 (north-south) and Interstate 691 (east-west). Metro-North, Shore Line East, and Amtrak commuter rail service routes run parallel to Interstate 95 and Route 1. The Hartford Line rail service will run parallel to Interstate 91 along the north-south rail corridor. Several of the Region's municipal plans of conservation and development have policies that recognize rail stations and major transportation corridors as areas of sustainable future growth.

Figure 5.1: Transportation Network, South Central Region

2 - Commuting Patterns

In 2019, 76.4% of workers in the South Central Region drove to work alone.⁴ The commuting characteristics of the Region are comparable to those of the State of Connecticut, where 78.2% of workers drove alone. Both the South Central Region’s share of workers carpooling (8.2%) and Connecticut’s share (87.9%) are lower in comparison to the United States usage, which is 9.0%. Bethany, East Haven, Hamden, Meriden, and New Haven have 9% or more of their populations carpooling to work. Additionally, 11.9% of New Haven’s workforce utilizes public transportation, which is far greater than the United States (5.0%) or Connecticut (4.7%). In contrast, the municipalities in the Region with the most reliance on the automobile are North Branford (91.0%), North Haven (85.4%) and Branford (85.0%). All of the municipalities, except for New Haven (58.7%), exceed the United States’ average of 76.3% of workers driving alone.

Figure 5.2: Percent of Workers Using Alternative Modes of Transportation, 2019

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates (Table S0801)

⁴ Workers are defined as the population aged 16 and older.

Table 5.1: Means of Transportation to Work, 2019

Geography	Means of Transportation to Work, 2019 (%)				
	Carpooled	Public Transportation	Walked	Other	Drove Alone

Source: U.S. Census Bureau, 2015-2019 American Community Survey 5-Year Estimates (Table S0801)

In 2019, the municipalities with greater than 80% of residents commuting outside of their hometown for work were Bethany (85.8%), East Haven (83.9%), Woodbridge (83.7%), North Branford (83.0%), and Orange (82.0%). Woodbridge experienced a 33.7% increase in the number of workers commuting outside the Town since 2000, the highest in the South Central Region. Conversely, New Haven saw the largest decrease, with 24.8% fewer workers leaving the City for work. The second largest decrease was in Madison with 11.9% fewer people leaving the Town for work. New Haven (47.8%) has the lowest percentage of workers commuting to a different municipality. *Table 5.2* lists the details for each municipality.

VI - Economic Vitality & Labor Force

1 - Median Household Income

According to the U.S. Census Bureau, income is defined as income received on a regular basis, excluding capital gains and before payments such as taxes, union dues, and social security.⁵ In 2019, the municipality in the South Central Region with the highest median household income was Woodbridge at \$157,610. New Haven has the lowest median household income at \$42,222. The national median household income was \$62,843. Two municipalities, New Haven and West Haven, fell below this threshold. Six towns fell below the statewide median household income of \$78,444: Branford, East Haven, Hamden, Meriden, New Haven, and West Haven.

Figure 6.1: Median Household Income by Municipality, 2019

Source: U.S. Census Bureau, 2015- 2019 American Community Survey 5-Year Estimates (Table B19013)

Table 6.1: Median Household Income by Municipality, 2019

Bethany	Branford	East Haven	Guilford	Hamden
\$ 129,133	\$ 77,640	\$ 67,390	\$ 111,870	\$ 77,274
Madison	Meriden	Milford	New Haven	North Branford
\$ 113,798	\$ 62,985	\$ 91,799	\$ 42,222	\$ 90,461
North Haven	Orange	Wallingford	West Haven	Woodbridge

⁵ U.S. Census Bureau. Income - About Income. Accessed on July 29, 2021 from <http://www.census.gov/topics/income-poverty/income/about.html>

In 2019, the median household income of Woodbridge was 113.62% higher than the State of Connecticut and 173.38% higher than the United States. The median household income of New Haven was 42.77% less than that of the State of Connecticut and 26.76% less than that of the United States.

Figure 6.2: Median Household Income, by Municipality, Compared to State and National Averages, 2019

Source: U.S. Census Bureau, 2015- 2019 American Community Survey 5-Year Estimates (Table B19013)

2 - Per Capita Income

Per capita income, as defined by the U.S. Census Bureau, is the mean income received in the past 12 months computed for every person (at least 15 years old) in a geographic area.⁶ It is derived by dividing the total income of all people 15 years old and over in a geographic area by the total population in that area. Guilford has the highest per capita income in the region at \$62,686. New Haven has the lowest per capita income in the region at \$26,429. East Haven, Hamden, Meriden, New Haven, Wallingford, and West Haven have per capita income levels below the statewide average of \$44,496. East Haven, Meriden, New Haven, and West Haven have per capita income levels below the national average of \$35,672. *Figure 6.4* shows the per capita income by U.S. Census Bureau-designated census block group.

Figure 6.4: Per Capita Income by Census Block Group, 2019

3 - Poverty

Poverty level is determined by income thresholds set by the federal government based on factors including family size and ages of the members. Those families whose income is less than the determined thresholds are considered to be living below the poverty level. Individuals living below the poverty level in the South Central Region generally increased since 2010. Only Branford, Meriden, North Haven and Wallingford experienced a marginal decrease in poverty. As of 2019, New Haven had the highest poverty rate at 26.5%. Bethany and North Branford had the lowest poverty rates in the Region at 2.4% and 2.5%, respectively. The largest percent increase occurred in Madison, which had a 2.4% increase in the population living in poverty since 2010. The largest decrease occurred in Meriden, which had 3.4% decrease in the population living in poverty since 2010.

Source: U.S. Census Bureau, Census 2000, Census 2010 and 2015-2019 American Community Survey 5-Year Estimates (Table S1701)

4 - Labor Force

The labor force⁷ in the South Central Region has remained fairly stable with only a slight increase since 2010 (Figure 6.6). The South Central Region, State of Connecticut, and the United States all experienced an increase in labor force since 2013. Between 2010 and 2019, four municipalities in the South Central Region experienced a decrease in the labor force: East Haven, Meriden, West Haven and Woodbridge (Figure 6.7 and Table 6.4).

Figure 6.6: Labor Force, 2000-2019

5 - Unemployment

In 2019, the South Central Region, State of Connecticut and the United States had unemployment rates between 3.6% and 4.0%. The Region’s unemployment rate decreased from 5.05% in 2018 to 3.69% in 2019. The unemployment rate in Connecticut remained the same at 4.0% between 2018 and 2019, while the unemployment rate in the United States declined by 0.62% between 2018 and 2019. The highest unemployment rates were experienced in 2010, with the Region, Connecticut and United States having rates over 9.0% (Figure 6.8). The economic recession that occurred from 2007 to 2009 is largely responsible for the increase in unemployment during 2010. In 2019, four municipalities, East Haven, Meriden, New Haven, and West Haven had unemployment rates higher than the state average of 4.0%.

Table 6.5 displays the year-to-year changes in unemployment from 2010 to 2019.
